

## Release Notes

### New Features & Enhancements

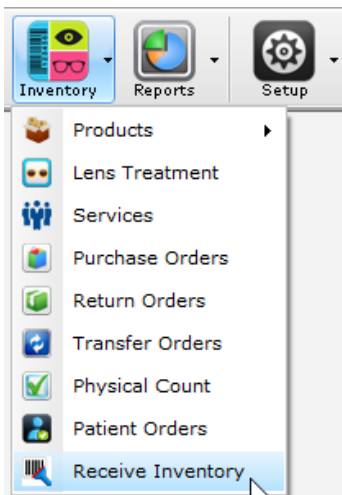

- ★ **Global Payment (X-Charge) Payment processing:** VisionPro payment processing interface allows our customer to process all major credit card and debits card from within the application. This will allow our customers to process the payment fast and securely using X-Charge payment gateway.

- ★ **Gift Cards:** VisionPro is introducing a new module which enables you sell Gift Cards to your clients. You will have an option to either use pre-printed gift card or print on paper using regular printer. You clients can now purchase a gift card for their friend and family which can be redeemed at any time towards any purchase.

- ★ **Receive Inventory:** Ability to receive inventory items directly without creating Purchase Orders. With this module the business can receive all existing and new inventory items including Frame, Lens, Contact lens & Accessories.

- ★ **Inventory Item Discount / Sale:** Ability to set discounts for an individual inventory item in either amount or percentage. The discount will be automatically selected and applied on the invoice.

The screenshot shows the 'Product Entry' window for 'Frames'. The window title is 'Product Entry' and the main title is 'Frames'. At the top, there are buttons for 'New', 'Save', 'Save & Close', 'Delete', 'Cancel', and 'Print Barcode'. Below this is the 'product Details' section with fields for Item ID (ITM0661), Model # (006), Type (Frames), Location (Park Place), Supplier Name (Fashion Excellent), Brand/Collection (Fashion Excellent), Tax (TAX(8.875%)), and an Item Picture placeholder. There are also checkboxes for 'Active', 'Discontinued', and 'Dispensable'. Below this is a section for 'Stock' and 'Inventory' with various numerical fields like Reorder Level, Internal UPC, Supplier UPC, Supplier Cost, Landing Cost, Markup Multiplier, List Price (\$199.00), Profit (\$199.00), Last Ordered, Last Received, Last Sold, Average Cost, Spiff, Qty On Order, Total Sold, Patient Returned, and Transfer Out. At the bottom, there are tabs for 'Frame Properties', 'Item By Location', and 'Item History'. The 'Frame Properties' tab is active, showing fields for Eye, Bridge, Temple, A, B, DBL, ED, Circumference, ED Angle, Frame Color Code, Frame Color (53), Lens Color Code, Lens Color, Product Groupname, Frame Material (15), Frame Shape, Rim Type, Gender Type, Age Group, Model Style, Description, Style New, County Manufactured, and Year Introduced (December 2014). There is also a 'Notes' field. At the very bottom, it says 'Created On : 12/23/2011 07:45:40 PM' and 'Modified On : 12/23/2011 07:45:40 PM'.

- ★ **Transfer Patient:** Ability to transfer a Patient from one location to other. The patient demographics will be transferred over to other location but the previous sales will not be effected and will remain same for the previous location. The other location will be able to see the entire history of that patient.

The screenshot shows a patient management menu. At the top, there are three icons: a person icon labeled 'Patient', a document with a dollar sign icon labeled 'Invoices', and a folder icon labeled 'Lab Order'. Below these are several menu items: 'Contact', 'RX', 'Invoice', 'Lab Order', 'Files & Attachments', 'Family', 'Recall', 'Merge', and 'Transfer Patients'. The 'Transfer Patients' item is highlighted with a mouse cursor pointing to it.

- ★ **Transfer Orders Enhancements:** Visionpro will now have an ability to track quantities of the transfer order items along with their reason and status of individual item. You can also generate a report based on number of different criteria's. Visionpro will also add a transaction in the item history section for that item recording when it was transferred and when it was received.

The screenshot shows the 'Product Entry' window for 'Frames'. It includes a toolbar with 'New', 'Save', 'Save & Close', 'Delete', 'Cancel', and 'Print Barcode'. The 'product details' section contains fields for Item ID (ITM8603), Model # (5244/50/6058/53), Type (Frames), Location (Park Place), Supplier Name (C O S), and Brand/Collection (Silhouette). The pricing section shows Supplier Cost (\$0.00), Landing Cost (\$172.95), List Price (\$519.00), and Profit (\$346.05). The 'Frame Properties' section includes fields for Eye (53), Bridge (19), Temple (140), and various measurements. A 'Transfer Out' button is highlighted in yellow.

- ★ **Spectacle Order Rx type Auto-calculation:** Ability to automatically calculate and convert a Standard Rx to Reading, Distance or Computer Rx while adding the Rx to a Spectacle Order.

The screenshot shows the 'Rx - RID1348 - 05/10/2012' window. It includes a 'Update Original Rx' checkbox and fields for Doctor and Optician. The prescription table is as follows:

	Sphere	Cylinder	Axis	Add
R	-0.25	+0.00	000	+1.00
L	+0.00	+0.00	000	+1.00

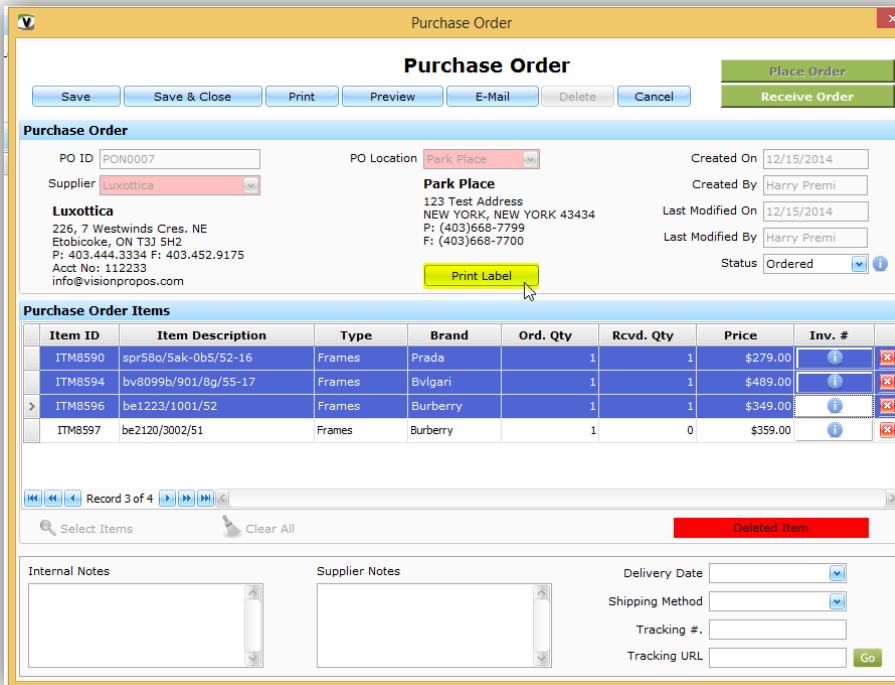

Below the table are fields for Prism1, Base1, Prism2, and Base2. Buttons for 'D', 'R', and 'C' are highlighted in yellow.

- ★ **Quick Sale PO Frame:** Ability to add Material, Color, Color code, Rim type and Shape while entering a Patient owned frame in Quick Sale.

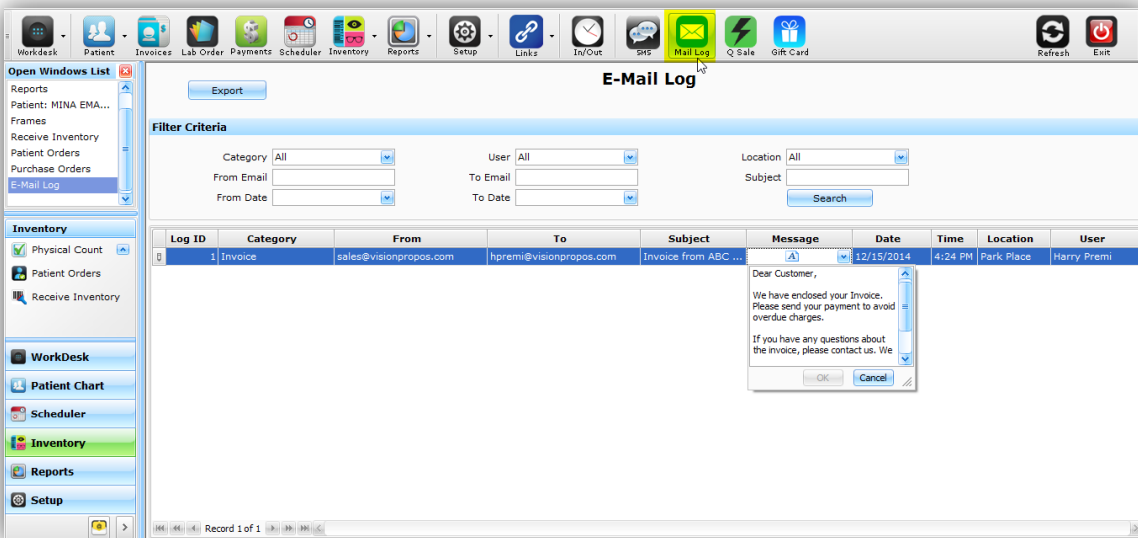

The screenshot shows the 'Frame' window. It includes a 'Supplier' field, a 'Brand' dropdown, and radio buttons for 'Enclosed' and 'To Come'. There are checkboxes for 'Frame Warranty' and 'Sup. Invoice'. The 'Material' and 'Color' fields are highlighted in yellow. The 'PO' button is also highlighted in yellow.

- ★ **Received Barcodes:** Ability to print barcodes only for received items in a Purchase order.

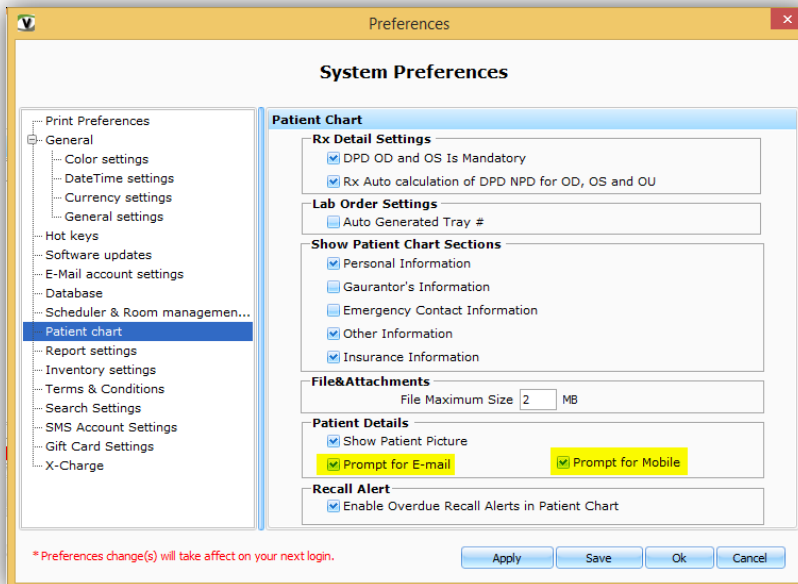

- ★ **Email Log:** Ability to keep a log of all outgoing emails.

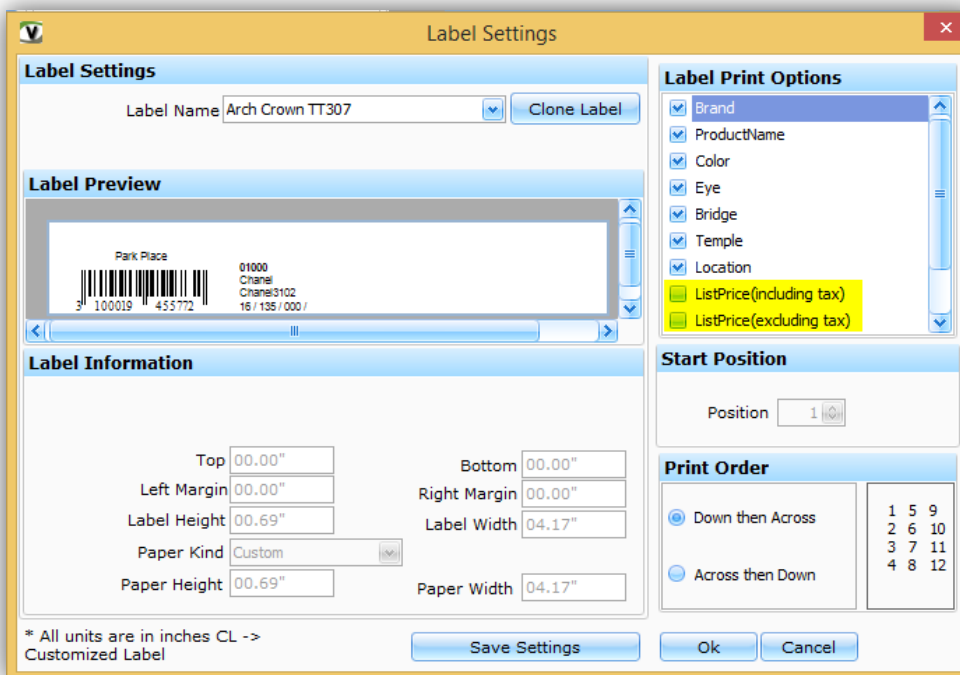

- ★ **Lens Group:** Added a Lens Group field to Lens Inventory.
- ★ **Invoice Notes:** Ability to print the notes entered by a user on the Invoice Report.
- ★ **Rx Auto-calculation:** Ability to disable auto-calculation of DPD, NPD for OD, OS and OU under System Preferences.
- ★ **Rx Selection:** Ability to filter and select a Rx by Rx type while creating a Spectacle Order.
- ★ **Email Address Alert:** Ability to show an alert if the user tries to save New Patient information without adding Email address.

- ★ **Mobile Number Alert:** Ability to show an alert if the user tries to save New Patient information without adding Mobile Number.

- ★ **Promotion Edit:** Ability to edit a Promotion amount while applying it in an invoice. Ability to define security rights to grant a user permission to edit a Promotion amount.
- ★ **Barcodes List price with or without tax:** Ability to print list price on the barcodes including tax amount or excluding tax amounts.

- ★ **Lab Order SMS:** Ability to send a text message to clients from Lab Orders lookup screen when their order is ready for pick-up.

- ★ **Undo a Void:** Visionpro will allow users who has rights to undo an invoice. This will reverse the VOID action on the invoice. *Note: All the X-Charge payments will not be reversed.*
- ★ **Rx Label:** Ability to print a Rx on a small Patient Label size paper. This is a great feature if you would like to print the Rx on patient label and stick it to the back of your business card or on the Invoice.

- ★ **Product Security:** Ability to define security rights for adding and editing inventory items in VisionPro.
- ★ **Payment Notes:** Added 'Notes' field in Patient and Insurance Payments section. Ability to print notes entered in End of Day reports.
- ★ **Date Override:** Ability to define security rights to grant a user permission of changing dates for Invoices, Lab Orders, Items and Payments.
- ★ **Customize Labels:** Ability to customize various label names in VisionPro according to user requirements. Eg: OD, OS, OU can be changed to R, L, B in patient Rx section.
- ★ **Manual Physical Count:** Ability to search an inventory item from grid view and add each individual frame one by one.
- ★ **Email Subject:** Ability to set a subject for each email that goes out from VisionPro.
- ★ **Company Logo:** Ability to limit the size of Company logo.
- ★ **SMS Templates:** Added few default SMS templates.
- ★ **Import:** Ability to check Eye, Bridge, Temple and Frame Color code when checking for duplicates while importing frames.
- ★ **Void Print Preview:** Ability to show a void status and void reason on a voided invoice print report.
- ★ **Tray Label Template:** Added a new Tray Label template.
- ★ **Email from Lab Orders:** Ability to send an email to Patients from Lab Orders lookup screen to notify them for pick-up.
- ★ **Patient Age in Lab Order report:** Added a System Preference to show or hide Patient Age in Lab Order Print report.
- ★ **Edit Contacts Rx:** Ability to edit Rx in Contact Lens order.
- ★ **Patient Chart from Invoice Lookup:** Ability to open a Patient Chart directly from Invoice lookup screen.

- ★ **Reports:** Additional reports have been added in report section. All the reports have been redesigned making them compact and printer friendly.

Following is the list of reports that have been added and enhanced in this version:

### New Reports & Enhancements

#### **Patient Chart**

- Account Statement **(New)**

#### **Sales & Payments**

- Insurance Invoice Detailed **(New)**

- ★ **Delete Purchase Order Items:** Ability to delete the items in a Purchase Order even after the order has been placed. Ability to strike the items and mark them deleted without removing from the list, for auditing purposes.
- ★ **Price on Lab Order Report:** Ability to show or hide item prices in a lab order report.

## Issues

- ✓ **Patient Appointments:** Ability to select the logged in location for showing the patient appointments.
- ✓ **Invoice Details:** Created On, Created At and Created By showing last date modified instead of created information.
- ✓ **Print Appointments:** Clicking on Print Appointments under Scheduler will show only the available users for the selected location.
- ✓ **Insurance Refund:** Applying an insurance refund while voiding an Invoice does not give an error.
- ✓ **Date Modified:** Updates Date Modified field for an Inventory item when its Physical Count is done.
- ✓ **Date Time modified:** Updates Date Time modified whenever a user updates an Inventory item from anywhere in the application.
- ✓ **DOB Verification:** While importing Patients, verification will throw an error if the Date of Birth is, for eg. 01/01/1900
- ✓ **Scheduler Default Time slot:** Scheduler will now pick the time slot from System Preferences.
- ✓ **Deceased Date:** Checking the deceased checkbox in a Patient Chart will not ask for deceased date.
- ✓ **Email Import:** Checks for a valid email address while importing.
- ✓ **Object Reference error:** Does not show an Object Reference error when the computer is not connected to internet.
- ✓ **Frame Bridge error:** Does not give an error message when entering incorrect bridge value for a frame under Spectacle Order.
- ✓ **Patient Label:** Showing Patient age on a Patient label printed from a Patient Chart.
- ✓ **Supplier Brands:** On Lens treatment lookup, Suppliers and Brands populating correctly in the drop-downs.
- ✓ **Return reason:** Return order reason is getting saved for Lens treatments.

- ✓ **Chart Number:** Special characters are allowed while entering Chart number in a Patient chart.
- ✓ **Sold Quantity:** Creating a Spectacle or Contact order and then converting it into an Invoice will not double the quantities of the items.
- ✓ **Restore selection:** Selecting Restore option directly selects the Restore radio button.
- ✓ **Labels Item Number:** Item No. showing on all label types.
- ✓ **Services:** Quantity field is enabled for Services in Quick Sale.
- ✓ **Lab Order Report:** Showing only the items related to the respective spectacle order on the lab order print report.
- ✓ **Product Security:** User who does not have access to Product Add and Edit will not be able to save the item in Inventory grid.
- ✓ **Invoice security:** User who does not have write access for Invoice under Patient Chart will not be able to open, edit or save an invoice.
